

Product development

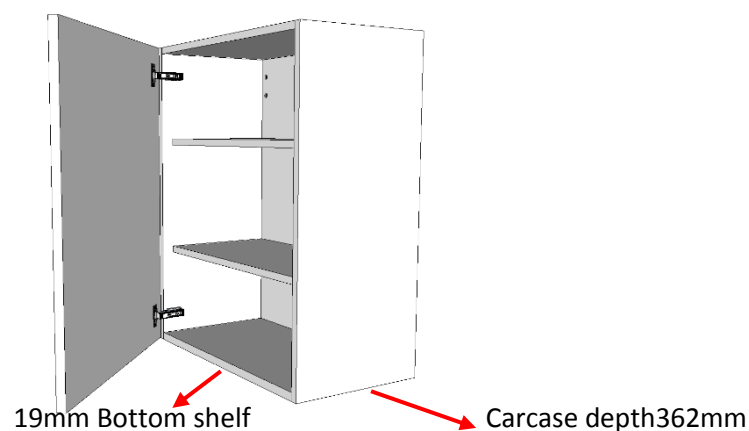

Wall units

October 2020

Dear Trading Partner,

During our in-house exhibition 2020 we have already presented our technically revised wall unit.

We are changing the carcass depth from 330mm to 362mm.

In this way we increase the storage space depth to the size of a pizza plate. At the same time, the bottom shelf of the wall unit is changed to 19mm thickness.

The well-known features, such as our screwed back panel, the full depth bottom shelves in colour, etc. will remain as part of our standard range.

From delivery week 43/2020 on we will deliver the new carcass design. The previous carcass depth of 330mm can still be made and will be available for aftersales deliveries to existing kitchens.

If you have any questions, please do not hesitate to contact your responsible agent or your contact person in our sales team.

With best wishes

Your RWK & Kuhlmann Küchen - Team
